

Compost Supplements

Mushroom Supplement Data Sheet

- **Full House® S44 Supplement:** Consists of roasted, full-fat cracked soybean particles coated with proprietary antimicrobial mixtures. The larger particle size allows the slow release of nutrients into the mushroom crop resulting in minimized temperature surges.
- **Full House T6 Supplement:** Blended components designed to maximize mushroom yield while avoiding high compost temperature surges. The T6 supplement is a mixture of a high-protein, coated with an antimicrobial treatment and a proprietary non-protein ingredient.
- **Full House T7 Supplement:** Ingredients are blended to increase mushroom yield. The T7 formulation contains the same propriety ingredients as the T6 supplement, but is combined to deliver a higher protein level.
- **Full House T52 Supplement:** Our newest supplement contains the same ingredients as the T6 and T7 supplements, but is blended to deliver a mid-range protein level.

Ask your Lambert sales representative about alternative coatings.

Supplemental Analytical Values

Supplement	% Nitrogen	% Protein	% Fat	% Fiber
S44	6.25	36.00	18.75	5.75
T6	7.00	44.00	2.50	30.75
T7	10.50	66.00	1.25	21.00
T52	8.75	52.00	1.87	25.87
